An intelligence operation conducted by troops of the 5th Brigade of the Colombian National Army enabled the dismantling of an alleged gasoline cartel engaged in criminal activity in southern Cesar.

Authorities began their successful investigations with a search warrant for a residence in the municipality of Aguachica, Cesar, where the troops, in a support role with Judicial Police personnel, arrested three men, aged 35, 42, and 19, who apparently dedicated themselves to selling fuel from abroad.

The contraband seized from those arrested amounted to 7,230 gallons of illegal gasoline, which is equivalent to around 31,000 dollars. Apparently, a portion of that monetary sum used to fund the drug-trafficking networks engaged in criminal activity in this part of the country.
